

Connect & Meet

FlexPanel PX

Wireless presentations and hybrid meetings. Everything you need for a fully functional meeting room – built into a refined, ready-to-use solution. Tested, intuitive and reliable.

Wireless

FlexPanel PX comes fully configured for wireless audio and video sharing. Everything is tested and ready from the start – no installation, no drivers, no surprises. Just connect and start your meeting.

Acoustic Panel

The integrated acoustic panel reduces echo and unwanted reflections, creating a pleasant sound environment that supports focus, conversation and digital meetings.

Serviceability

FlexPanel PX is designed for easy access during service or upgrades. Components can be checked or replaced without dismantling the entire installation.

Videobar

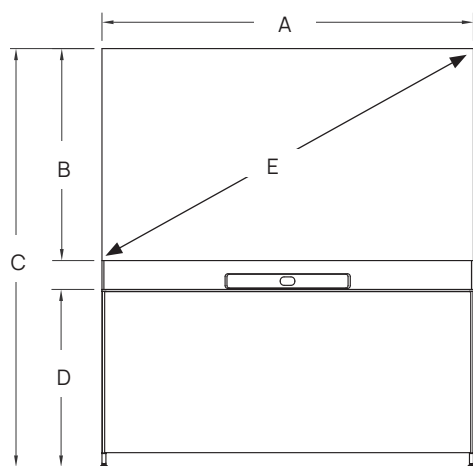

With 4K resolution, auto-framing and intelligent light compensation, the image automatically adapts to the room. Beamforming microphones capture speech clearly even at a distance, while the speaker system delivers natural and powerful sound.

Sustainability

Manufactured with environmental responsibility in mind – using long-lasting materials with a high recycling rate. FlexPanel PX contributes to more sustainable interiors and a reduced environmental footprint over time.

Safety

All technology is securely enclosed behind the panel – with no loose cables, visible connectors or dust-collecting gaps. This reduces the risk of tripping, electrical hazards and fire, while keeping the room tidy and safe.
